

Inovonics Duress Pendant

- Discrete form factor – much like a garage door opener
- Robust design
- Two buttons to prevent accidental activation
- LED to confirm activation
- Belt clip moulded to unit for ease of use
- Water resistant

How to Use

To send an alarm:

- press both activation buttons simultaneously for at least one second.
- Alarm signals are sent as indicated by the blinking transmission LED.
- When the buttons are released the transmission will be terminated
